TECHNICAL SKILLS

- Front-End Development:** HTML, CSS, React, React Native, Bootstrap, Tailwind
- Back-End Development:** Java, Python, Go, PHP, Node.js, Express
- Database Management:** MySQL, MongoDB, Database Design
- GUI Development:** JavaFX
- Tools & Platforms:** Git, GitHub, Postman, Figma, Canva

CERTIFICATIONS & COMPETITIONS

- Problem-Solving International Hackathon 26 - Participant (March 2026)
- Postman API Fundamentals Student Expert certification - Postman (December 2025)
- Microsoft Azure AI Fundamentals - Microsoft (May 2025)
- Java Object-Oriented Programming - LinkedIn (March 2025)
- Web Design for Beginners - University of Moratuwa (August 2024)

PROFILE

I am currently pursuing my Bachelor's degree in Computer Science at the University of Westminster. With a strong foundation in full-stack web development, UI/UX design, and Database Management, I enjoy designing interactive websites, developing scalable applications, and working with both front-end and back-end technologies. I thrive in fast-paced environments, love collaborating with teams, and am always eager to learn and adapt to emerging technologies.

EDUCATION

- Informatics Institute of Technology, affiliated with University of Westminster** (2024 - 2028)
BSc (Hons) Computer Science - Running Average: 88.6%
- Government Science College, Matale** (2017 - 2022)
 - A-Levels : Combined Mathematics (S), Physics (S), Chemistry (S), General English (A), GIT (A)
 - O-Levels : 9A Passes

EXPERIENCE

WSO2 - Asgardeo Thunder (Open Source Contributions)

- Contributed to the Asgardeo Thunder open-source project by resolving real-world issues and improving developer experience.
- Fixed a security bug related to environment variable handling in PowerShell setup scripts.
- Enhanced project documentation by adding Windows development prerequisites, improving onboarding for new contributors.
- Conducted testing and validation to ensure stability and correctness of fixes before submitting PRs for review.
- Followed industry standard Git workflows, including branching, rebasing, squashing commits, and pull request reviews.

PROJECTS

CookMate - AI & IoT-Based Cooking Companion App (Ongoing)

- CookMate is a smart cooking assistant designed to make cooking easier, safer, and more interactive by combining AI-powered recipe suggestions with IoT-enabled real-time monitoring.
- Focused on frontend development, including UI design, API integration, and CRUD functionality
- Built the mobile application using React Native with a backend powered by Node.js & Express
- Designed features for personalized recipes, step-by-step guidance, and enhanced kitchen safety

Technologies: React Native, Node.js, Express, Firebase, Arduino, MQTT

EXTRACURRICULAR ACTIVITIES

- **Member of IEEE Global** (2024 - Present) - Membership No: 100623704
- **Member of IEEE Computer Science Society, IIT** (2024 - Present)
- **Senior Prefect** (2020-2021)

SOFT SKILLS

- Teamwork
- Leadership
- Communication Skills
- Time Management
- Adaptability

LANGUAGES

- English (Fluent)
- Sinhala (Native)

HOBBIES & OTHER INTERESTS

- Content Creating
- Creative Design & Arts
- Reading & Research
- Report & Article Writing

Artiverse - Platform for Sri Lankan Artists

(Ongoing)

- Designed a Figma prototype for an AR-enabled art marketplace platform
- Planned system architecture using React, Node.js & Express, and MongoDB
- Researched and selected AR technologies, including AR.js, Three.js, and WebXR
- Integrated authentication strategy using Asgardeo (planned)
- Conceptualized features for artist collaboration, artwork visualization, and online sales

Technologies: React, Node.js, Express, MongoDB, AR.js, Three.js, WebXR, Asgardeo

Personal Portfolio Website (Deployed on Vercel)

(Aug 2025 - Aug 2025)

- Developed a fully responsive personal portfolio website to showcase projects, skills, and achievements
- Implemented light/dark theme toggle for improved user experience
- Designed and structured sections including About, Skills, Projects, Education, and Certifications
- Integrated an interactive contact form using EmailJS for direct communication
- Applied clean UI/UX principles with a minimal and modern design

Technologies: HTML, CSS, JavaScript, Bootstrap

GPA Calculator & Prediction Tool for IIT Students

(Jun 2025 - Jul 2025)

- Developed a Java-based application to calculate and predict GPA using 2nd-year and full academic results
- Implemented both console-based and JavaFX GUI versions to enhance usability
- Designed flexible input handling for final module grades and individual assignment marks
- Focused on a user-friendly interface and accurate academic performance estimation

Technologies: Java, JavaFX

UI/UX Design Projects

- CookMate App - UI/UX Design (Figma)
- Personal Portfolio Website - UI/UX Design (Figma)
- Artiverse Website - UI/UX Design (Figma)

Additional Projects

- Aqua Protect - Marine Conservation Website - HTML, CSS, JS
- Petals & Loops - E-commerce Website for Crochet Bouquets - HTML, CSS, JS
- Prime Estate - Real Estate Platform - React (Deployed on Vercel)
- Traffic Data Visualizer - Python, Tkinter
- GIF Generator - Python
- Retail Platform - PHP, MySQL, HTML, CSS

ARTICLES

Smarter Shields: AI's Role in Defending Against Zero-Day Threats

- **StackMedium Article of the Month - June Winner**
(Published by the IEEE Computer Society Branch Chapter Of IIT)
- This Article Explores how artificial intelligence strengthens cybersecurity by detecting and mitigating zero-day vulnerabilities that traditional tools often miss. Highlights real-world use cases from companies like Darktrace, CrowdStrike, and Google, while addressing challenges such as false alarms, bias, and privacy concerns. Emphasizes the future of AI-human collaboration in building resilient digital defenses
